

ASV nail

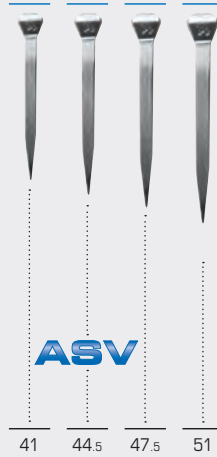

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **ASV nail** again has American design features, which is why it is especially suitable for U-fullered horseshoes. In comparison to the RN the head of the ASV nail is somewhat smaller ensuring that it fits securely and strongly in the nail hole, so that the head is almost flush with the surface of the horseshoe. The ASV is also a very good choice for most race-style shoes.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.
