

The perfect combination of tradition  
and innovation

**MUSTAD**  
DESIGNED TO PERFORM

# BaseMax<sup>®</sup>

The Mustad BaseMax is a traditionally ¾-fullered European riding horseshoe. It is the successor of the popular BM shoe. The clip is drawn from the metal of the shoe. BaseMax horseshoes have their clips drawn out of the metal from the web of the shoe, in a traditional style. Its inside clip has an optimal position to offer a maximum support. The nail holes of this range are also punched slightly coarser making it possible to fit the shoe slightly wider to the hoof or to accommodate thicker-walled hooves.

### Maximum flexibility

- wide variety of sizes and sections
- easier shoe adaptations

### Innovative features

- wider toe section, for better fit and balance
- symmetrical coarseness of the nail holes: to ensure even support to an even balanced hoof
- broader and wider clip for perfect fit with pads
- wider heels for easy fit and additional support
- the size number is positioned right after the end of the crease for easy and even drilling of stud holes

### Recommended nails for this product

### Front shoes

**Model** typical left and right

**Toe clip**

**Sizes** 4\*0 - 6

### Hind shoes

**Model** typical left and right

**Side clips**

**Sizes** 4\*0 - 6
