

Combo nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The properties of the **Combo** nail are similar to those of the City nail (see City). The difference between the two is that the Combo nail is especially suitable for larger-section shoes.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.
