

# Concave® nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **Concave® nail** has a special head shape that prevents the nail from twisting in the fuller and nail hole. This nail fits very well in concave shoes as well as in Equi-Librium® and Eventer® shoes. The concept of **PITCH™** offers a small angle between nail head and the shank of the nail which supports nailing on with a correct angle which reduces possible pressure on the hoof wall. The longer slim and strong shank gives the option to nail higher when this is preferred or necessary.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For medium weight shoes

Stamped for V-cress

- Type Angled head
- Model E nail origin
- Shoes Concave and V-fullered shoes
- Sizes Concave 2 (48 mm) - Concave 6 (59.5 mm)
