

# CSTÖ nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **CSTÖ nail** has a short neck and a thin shank. The neck is slightly shorter than that of the FJ. This nail is intended for slender and light horseshoes and fits very well and securely in the many trotter and sliding horseshoes.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.
