

E-slim nail

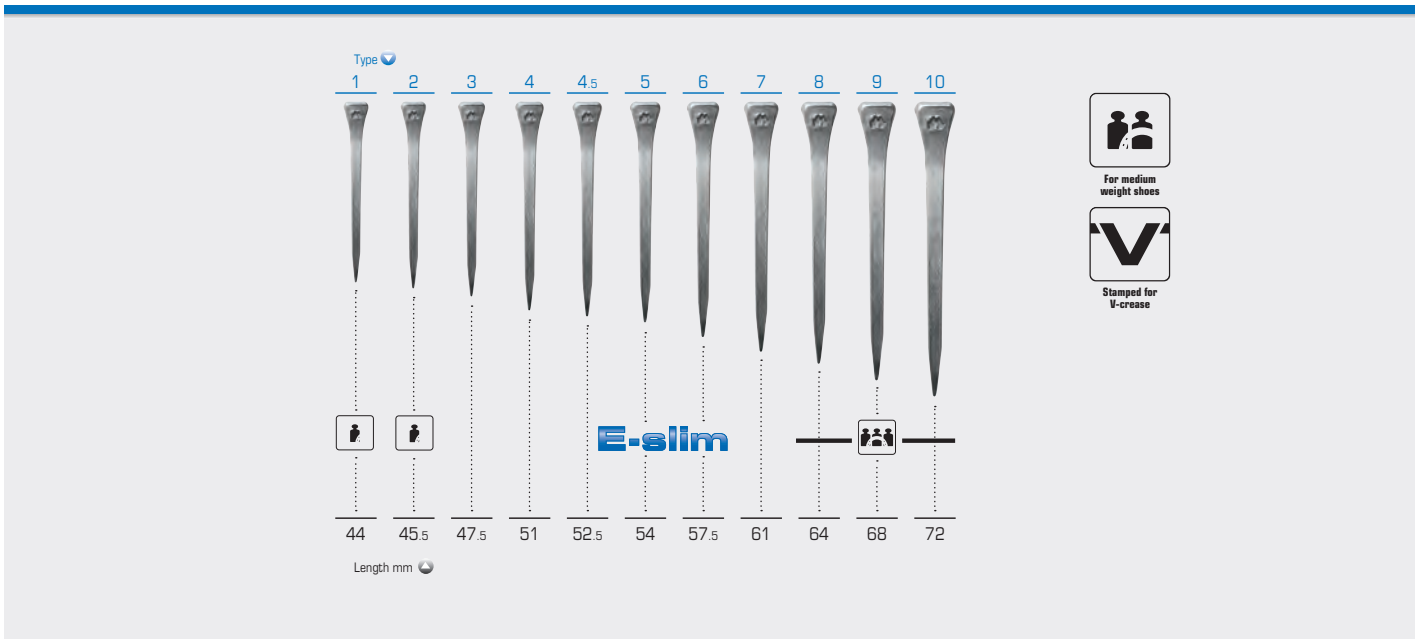

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **E-slim nail** is manufactured with a longer thinner shank than the E-nail so that it can be driven simply, precisely and high into the hoof wall. The E-Slim is ideal for horses with a thin hoof wall, such as many warmbloods, as it causes even less disruption to the hoof wall than the slightly thicker E-nails. All Mustad nails are highly polished allowing them to glide precisely through hoof horn without deviation from the intended path.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

Type E head
Model European style, with a rectangular head
Shoes V-fullered: LiBero, BM, DM, Equi-Librium
Sizes ESL1 (44mm) - ESL10 (72mm)
