

EXL nail

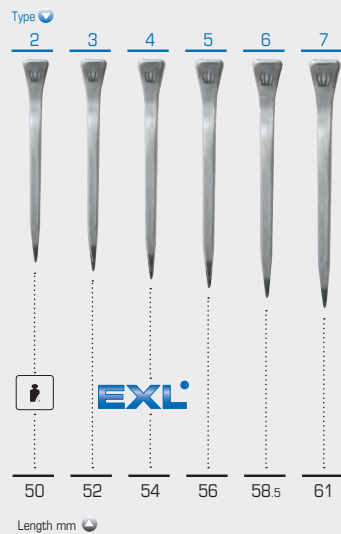

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

EXL® is a high-quality nail suitable for high nailing with minimum displacement of the hoof wall. The reinforced neck gives the nail the optimised, strong fit into the shoe. The shank of the EXL® is even longer and thinner than that of the E-slim. A combination of design features turns the EXL® into a top-quality nail, which ensures an excellent fit in all V-fullered horseshoes, especially in the LiBero® and Equi-Librium® horseshoe.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For medium weight shoes

Stamped for V-crease
