

# FJ-slim nail

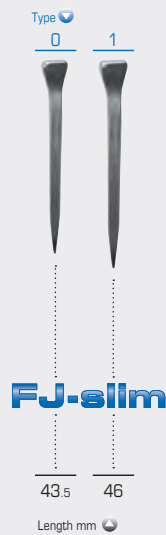

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **FJ-slim nail** has a longer and thinner shank than the FJ model. It is suitable for lighter breeds with thin hoof walls. This nail offers a reliable secure fit and minimises displacement of the hoof wall during shoeing. Thanks to the increased length of FJ-slim nails it is possible to nail these higher into the hoof wall.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For light weight shoes
