

HammerHead nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **HammerHead nail** is specifically designed to fit all race plates. The distinct neck and head waffle design, combined with the exclusive Mustad Pitch™ technology, provides a safe locking solution into the shoe crease. A long and slim shank, to drive high when needed, provides an easy and strong clinching. The sharp, exact point ensures a consistent drive, thus keeping the hoof wall impact to an absolute minimum.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.
