

JCF nail

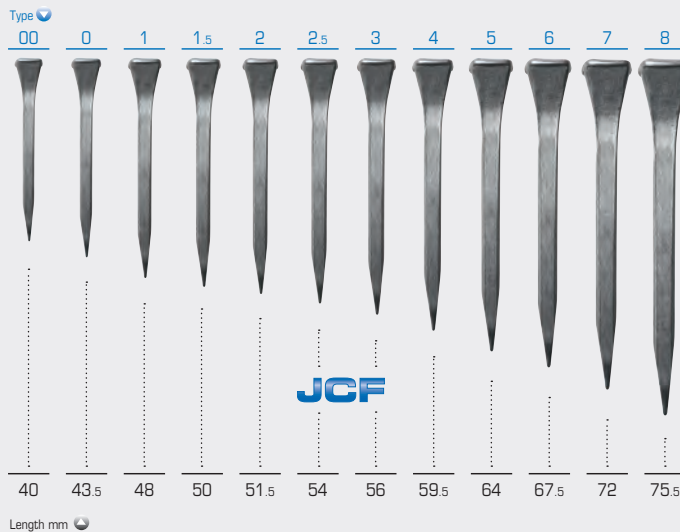

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **JCF nail** is a multi purpose nail with a long neck and similarities to the VF F nail. However, all proportions of the JCF nail are slightly less pronounced, especially the head. Since the nail range starts with small sizes this nail suits nice to lighter typed horses and ponies in which a strong nail is required due to heavy terrain demands.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For heavy weight shoes

Stamped for V-cress

- Type square crown head
