

JCI nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **JCI nail** is a multi purpose nail with a long neck and similarities to the JCF nail. However, it is slightly slimmer in the neck. This nail suits nice to lighter typed horses, riding horses and ponies in which a strong nail is required due to heavy terrain demands. It is specially designed for traditional Italian shoes.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.
