

MX nail

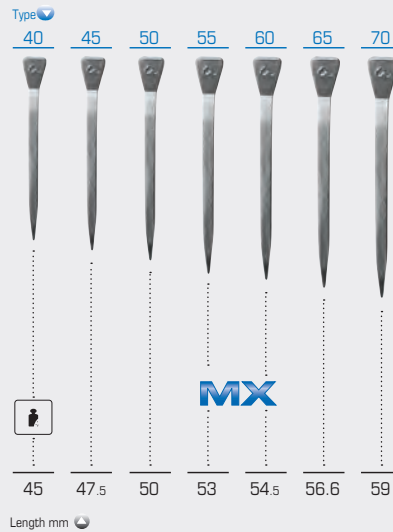

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The **MX nail** has an even slimmer shank than the E-Slim and has been developed to reduce horn displacement. This nail has been specially developed for horses with very sensitive, thin hoof walls.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For medium weight shoes

Stamped for V-cress
