

Mustad No-Snow Pad

Mustad No-Snow prevents the build-up of a dangerous snowball in shod hooves. It is available in 2 types, either made of very rigid though flexible transparent plastic (NoSnow) or a black artificial rubber with woven reinforcement (NoSnow Black). The transparent type is available in the following models: Mini, Standard and Maxi, both front and hinds. The black type has a Standard and a Trotter model, also both front and hinds. The unique air cushion compresses, then expands to push snow out of the hoof. This even prevents a dangerous snowball build-up, significantly

Model **Mustad No-Snow**
