

Swift nail

The Mustad "M" is always stamped on the inside of the nailhead and is placed on the same side as the bevel, as a simple guide for the farrier.

The Mustad **Swift**[®] nail is developed through a close collaboration with farriers specialized in racing disciplines. Swift meets the specific needs currently expressed by racing professionals. It has a very slim shank, especially appropriate for thin hoof walls. The short neck is ideal for thin shoes.

Precision, perfection and reliability are the definitive features of Mustad nails. Production of Mustad nails has a minimal tolerance, as quality is always our prime consideration.

For light weight shoes
